

SCIENTIFIC EXCELLENCE FOR IVD

Hytest's Technical Capabilities

NPD PROCESS PHILOSOPHY

Strong Dedication to In-house Product Development Resulting in a Comprehensive Portfolio of Antibodies and Antigens

Superior Scientific Knowledge

We have a deep understanding of technical needs for the life sciences community with extensive reagent development capabilities across a significant number of clinical areas.

Exceptional Brand Recognized for Highest Quality

Hytest is a pre-eminent brand known globally for the highest, uncompromised quality delivery from product development to secure global delivery for all immunological reagents needs of IVD manufacturers.

World Class Service

Our customer service with dedicated support team and deep scientific knowledge is ready to help you.

SOLID RECOGNITION FROM THE INTERNATIONAL SCIENTIFIC COMMUNITY

- Sponsoring of IFCC Distinguished Award for Contributions to Cardiovascular Diagnostics
- Participation in AACC and IFCC Standardisation committee work
- 50+ Articles published in leading scientific journals
- 10+ Patents and patent applications
- Hytest Cardiac award in 2015
- ~ 5 Poster or oral presentations per year
- Sponsoring of EFLM-Hytest Cardiac Marker Award
- 5 AACC Awards for best poster presentation deep scientific knowledge.

Our Industry-leading Product Line

PRODUCT CATEGORIES

Monoclonal antibodies
Polyclonal antibodies
Antigens
Sera and plasma

Cardiac Markers

Infectious Disease

Inflammation

Neuroscience

Thyroid Diseases

Blood Coagulation and Anemia

Tumor Markers

Bone Metabolism

Kidney Diseases

Metabolic Syndrome

Fertility and Pregnancy

Veterinary

Microbial and Plant Toxins

Hormone Markers

Immunology and Serology

Ability to Rapidly Commercialise Products to Meet Market Demand

Superior diversified portfolio that consistently outperforms the IVD reagent market on key product-specific metrics

- specificity
- reproductivity
- sensitivity
- supply security
- cross-reactivity

 **Hytest**
**SCIENTIFIC
EXCELLENCE
FOR IVD**

Hytest is a Leading Provider of Critical Components to the IVD Sector

We develop and manufacture world class antibodies and antigens for the IVD industry, leading to better diagnostics and improved patient outcome.

Since 1994, Hytest has developed and supplied immunological reagents for the IVD industry and research community. Today, we provide products for several clinical and research areas, and are proud to be a leading provider of reagents for troponin I immunoassays, as well as for certain infectious diseases.

We are renowned for our high level of quality that extends from product development to safe and secure deliveries worldwide. Continuous investment in scientific research forms a solid foundation for our product development, and our ISO9001 certified operations ensure that our products meet the highest levels of quality that you expect.
